

Paint Now.
If you ought to have painted last year and waited for paint to come down, how much do you think you made?
You'll buy an extra gallon this year. There's \$5 or \$6 for paint and labor. You think you won't, but you will; you can't stretch paint.
It is always so: the longer you wait, the more paint and wages. Besides, what paint is for. What is it for?

KRESO DIP

For All Live Stock
EASY AND SAFE TO USE.
KILLS LICE, TICKS, FLEAS, MITES, CURES MANGE, SCAB, RINGWORM, SCRATCHES, ETC. DESTROYS DISEASE GERMS AND DRIVES AWAY FLIES.
NON-IRRITATING. EFFECTIVE. INEXPENSIVE.
YOU can't afford to let lice, ticks, fleas and mites eat your stock alive. Get a supply of KRESO DIP and follow directions. It will put an end to the parasites and give the stock a chance to thrive and put on flesh. Use it in barns, hog pens, chicken houses and dog kennels—any place where there are vermin.

KRESO DIP is a coal tar product. It mixes readily with water. It does not burn or irritate like carbolic acid. It does not blister or take the hair off like kerosene. It costs less and does more than any of these. You can't make a better investment than to buy some Kresol Dip to kill lice, ticks, mites and fleas and prevent disease by destroying the germs.
One gallon of KRESO DIP makes 60 to 75 gallons when mixed with water. Each lot is STANDARDIZED by the manufacturers, therefore always the same.

An I H C Manure Spreader Is an Investment—Not an Expense

A MACHINE that makes two dollars where one was made before is not an expense—it is a good investment.

Careful tests made at the Ohio Experiment Station showed an average increased crop yield of \$15 an acre when eight loads of manure were properly spread. Spreading with a fork, it would take at least sixteen loads to an acre to produce the same result. By fertilizing twice as much ground with the same quantity of manure and doing the work better, an I H C manure spreader soon pays for itself. Add to this saving an increase of \$15 an acre in the value of your crops, and you at once see why we urge the purchase of an

I H C Manure Spreader
Kemp 20th Century, Corn King, or Cloverleaf

Ask the I H C local dealer to show you the self-aligning, removable boxes on the main axle; notice that the axles are roller bearing to reduce the draft; study the apron construction, and note the large rollers on which it runs. I H C spreaders can be used in any corner of the barnyard. There is no reach to interfere. The seat folds out of the way when filling the spreader.

If you appreciate machines of extra merit; machines that spread manure in ample range of quantities; machines which can be equipped with drilling attachments for use in market gardens, and above all, machines which are made in sizes convenient for every farm, investigate I H C spreaders. Go to the local I H C dealer and look carefully over the machines he shows you. Get catalogues and full information from him, or write

BRICK BREVITIES.

You don't have to live in dread of the fire alarm if your business is housed in a brick building. Some people think they can't afford to build with brick.

When they get to looking into the things, they find they can't afford not to.

The beauty of a brick house increases with age. And the beauty of it is that you don't have to paint it to make it do it.
